PROFESSIONAL EXPERIENCE

Spinny

Software Engineer II

Gurugram, India

Apr 2026 — Present

- Built a modular **widget-based discovery homepage** above the car listing page with **10+ configurable widgets** that product can reorder or swap without code deploys, routing users to inventory by session context.
- Replaced third-party prerender.io with an **in-house analytics and cache management dashboard** using **Next.js** and **Doris OLAP DB** to monitor bot traffic, CDN performance and cache health.
- Drove a **4.6% lift in visits and 7% lift in bookings** by implementing product flows and interactions for upcoming cars before live availability, improving early customer discovery.

Software Engineer I

Aug 2025 — Mar 2026

- Introduced a **personalized listing for high-intent users**, replacing generic listing with a contextual experience that surfaces ongoing activities and recommends next steps, driving a **3.3% visit rate uplift**.
- Transformed sale strategy from global discounts to targeted, **user and car specific** for High TAT cars, improving conversions from 0.7% to 0.8%; built **animated reveal experiences** for lightning deals.
- Redesigned the onboarding flow into a 3-step journey with smart drop-off recovery by applying partial responses as filters, resulting in a **5.3% uplift in test drive scheduling** and **5.4% increase in visits**.

InsuranceDekho

Software Engineer

Gurugram, India

Oct 2023 — Jul 2025

- Boosted conversion rates by **22% and reduced drop-off by 35%** by revamping the B2B SME insurance sales journey into a seamless end-to-end user experience.
- Engineered a scalable SaaS web application supporting 3 dashboards, integrating **JWT-based ABAC, SSR, SEO optimization, and client-side caching** using React Query and Next.js.
- Cut **page load times by 75%** across all SME product journeys via **route-based code splitting, lazy loading of heavy components, and bundle reduction**.

PROJECTS

xD-Drive

Tech Stack: Bun, Hono, Drizzle ORM, PostgreSQL, Supabase, Zod, JWT

Live Docs | GitHub

Ongoing

- Built a **type-safe cloud drive API** with nested folders, permission-tiered sharing, public links with expiry, storage quotas, and full activity audit logging.
- Designed a **single source of truth** from database to API docs (Drizzle, Zod, Hono OpenAPI), auto-generating interactive Scalar documentation and consistent validation across all routes.
- Implemented **secure cookie-based JWT authentication** along with soft-delete, archive, and restore lifecycle for files and folders.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, HTML/CSS, Sass, SQL

Frameworks: React, Next.js, Tailwind CSS, React Native/Expo, Hono.js

Libraries: Redux Toolkit, Tanstack Query, React Hook Form, Zustand, Zod, Lottie, Storybook, Jest

Database: PostgreSQL, MongoDB, Redis, Doris, SQLite

Observability: Sentry, Grafana, Elastic APM

Tools & Platforms: Git, Docker, GitHub Actions, Contentful, Payload CMS

EDUCATION

SRM Institute of Science and Technology

Bachelor of Technology in Computer Science and Engineering

9.41 CGPA

Sep 2020 — Jun 2024

ACHIEVEMENTS & POSITIONS

- Awarded **Spinny Squad Star – Revving Newcomer Award** for early-tenure impact and feature ownership.
- Won **Spinny Hackathon 2025** with a team of 5, building a **Google Veo** pipeline for AI-generated car ad videos.
- Selected as **Code for GovTech (C4GT) 2024 Contributor** with Avanti Fellows, shipping a platform powering 1,000+ educator sessions.
